

## Syntax for **postscript enhanced** option

**enhpost** is the product of David Denholm and Matt Heffron.

This guide is the product of Dick Crawford.

|   | text                   | result          |
|---|------------------------|-----------------|
| Superscripts are denoted by ^:                          | '10^{-2}'              | $10^{-2}$       |
| Subscripts are denoted by _:                            | 'A_{j,k}'              | $A_{j,k}$       |
| Braces are not needed for single characters:            | 'e^x'                  | $e^x$           |
| Use @ to align sub- and superscripts:                   | 'x@^2_k'               | $x_k^2$         |
| Put the shorter of the two first:                       | 'x@_0^{-3/2}y'         | $x_0^{-3/2}y$   |
| ...rather than:   | 'x@^{-3/2}_0y'         | $x_0^{-3/2}y$   |
| Font changes are enclosed in braces:                    | '{/Helvetica m}'       | m               |
| ...size, too:   | '{/8 m}'               | m               |
| ...or both:   | '{/Helvetica=18 m}'    | <b>m</b>        |
| Characters can be specified by code:                    | '{\120}'               | P               |
| ...which is how to get nonkeyboard characters:          | '{\267}'               | •               |
| Use keyboard characters or codes for other fonts:       | '{/Symbol p\271 22/7}' | $\pi \neq 22/7$ |
| Everything outside braces is in the default font:       | 'P = {/Symbol r}kT'    | $P = \rho kT$   |
| Space of a given size can be inserted with &:           | '<junk>'               | <junk>          |
|   | '<&{junk}>'            | < >             |
| Special characters (^,_,{,},@,&,\) can be escaped by \: | 'f{x,y\}'              | $f\{x,y\}$      |
| ...or \\ if within a double-quoted string:              | "f\\{x,y\\}"           | $f\{x,y\}$      |

Everything can be done recursively:

the text

'{/Symbol=18 \362@\_{/9.6 0}^{/12 \245}{'

{/Helvetica e^{-{/Symbol m}^2/2} d}{/Symbol m = (p/2)^{1/2}}'

produces the result:

$$\int_0^\infty e^{-\mu^2/2} d\mu = (\pi/2)^{1/2}$$

Note how font sizes and definitions are preserved across pairs of braces.

The default font for this page is /Times-Roman=12. These and other options may be changed on the command **set terminal postscript**. See the manual or **help postscript** for details.

# PostScript Character Codes

T = text (here Times-Roman) S = Symbol Z = ZapfDingbats E = ISO Latin-1 encoding  
(the "E" character set is accessed via an option on "set encoding" )

| T   | S  | Z | E | T   | S   | Z | E | T | S   | Z   | E | T | S  | Z   | E   | T   | S   | Z | E   |     |   |    |   |   |
